

MOCA POINT OF ENTRY FILTER

POEF 1006

Article number 695020494

PRODUCT CATEGORY: 41 CATV

STATUS: AVAILABLE

Product

MOCA POINT OF ENTRY FILTER
POEF 1006

MoCA technology makes it possible to connect your home data network to your in-home coax cable. Since an in-home coax cable is connected to the external cable network, the MoCA-signal can carry your network signal outside the home. Although not very likely, when your neighbours are also using a MoCA adapter, it may be possible for them to connect to your home network. To avoid this risk and to secure your network, you should install a Point-of-Entry filter (POEF) where the coax cable enters the home. Installing a POE-filter also prevents signal conflicts with other MoCA networks, and improves your MoCA network's performance. The POEF 1006 is easy to install.

MOCA POINT OF ENTRY FILTER

Specifications

Electrical specification

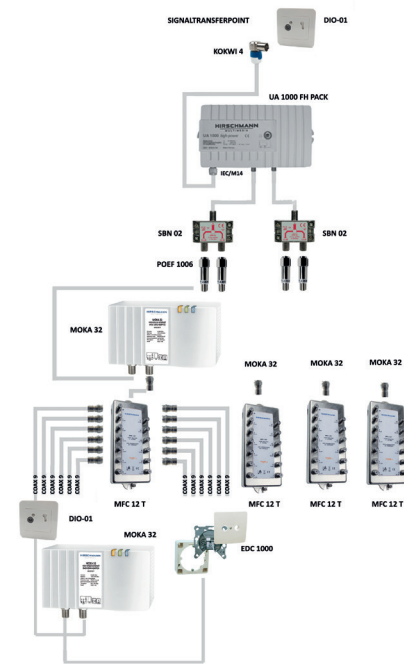

Frequency range	5 - 3000 MHz
Impedance	75 Ohm
Pass band	5 - 1006 MHz
Insertion loss	< 2.5 dB
Return loss	> 14 dB
Stop band	1125 - 3000 MHz
Rejection	> 40 dB
Screening effectiveness	Class A
Protection	IPx4

Mechanical specification

Housing material	Copper tube
Connector	F male and F female
